### INCIDENT MANAGEMENT SITUATION REPORT SUNDAY, SEPTEMBER 10, 1995 - 0900 MDT NATIONAL PREPAREDNESS LEVEL II

### \*\*\* ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT \*\*\*

Current Situation: Fire activity throughout the U.S. remained low. Large fires are meeting containment objectives, allowing demobilization to continue. Five Type I crews are being demobilized from Canada today to the Northern Rockies.

#### East Basin Large Fires

OUTLOOK: An upper level low pressure system over the northern Rockies wil

begin to move east by late Sunday, maintaining a cool and humid airmass over the area. High pressure will strengthen over the Pacific Northwest, with morning low clouds west of the Cascades burning off by afternoon. Monsoonal moisture will continue from Arizona, across southern Utah, Colorado and New Mexico triggering scattered wet thunderstorms. The Great Basin and California will be dry and sunny. Temperatures across the West will range from the 60's and 70's in the Pacific Northwest and mountainous areas, to around 115 degrees in the southwestern deserts. The northeastern states will be mostly sunny and windy with a chance of showers from New Hampshire's White Mountains eastward into Maine. Temperatures in the East will be in the 60's and 70's, with gusty northwest winds at 10-20 MPH.
